- The gotong-royong was held mainly as a campaign to promote environmental cleanliness in the Sandakan Rainforest Park. To keep the park clean, the park users would have to play their role. No littering, particularly with non-biodegradable rubbish, e.g. mineral water bottles, and always ensure that the place is kept clean after any event.
 - The Forestry Department has also put up some display cabinets at the Kebun Cina Gallery, beside the car park next to Taman Tshun Ngen. Some panels are still under construction, but the public is welcome to visit the gallery featuring some of the flora, fauna and other natural features, as well as the history of Kebun Cina.
